

# Canadian Red Cross Instructor Transfer Pathway

Red Cross is a world leader in First Aid & CPR training. Our Instructors are the cornerstone of our learner-centered programs. Through our Instructor Development Centres, Instructors are supported with state-of-the-art instructional tools to help them customize the learning environment to the various provincial, industry and personal learning needs of the participants.

## Who should take this training?

The Instructor Transfer Pathway is designed for Instructor candidates who have instructional experience with another recognized program/agency, as a Red Cross Water Safety Instructor/Trainer or as an elementary/secondary school educator. Our Instructor Transfer Pathway recognizes your current and past training/experience and gives you a fast track to certification as an Instructor with the Red Cross.

As a Red Cross Instructor you can apply to work for an established Red Cross Training Partner or support in-house training for your company or organization, or even start your own business (limitations apply).

## What are the prerequisites?

- 18 Years of Age
- Red Cross participant level certification in the discipline you wish to teach\*
- Complete a skills evaluation\*

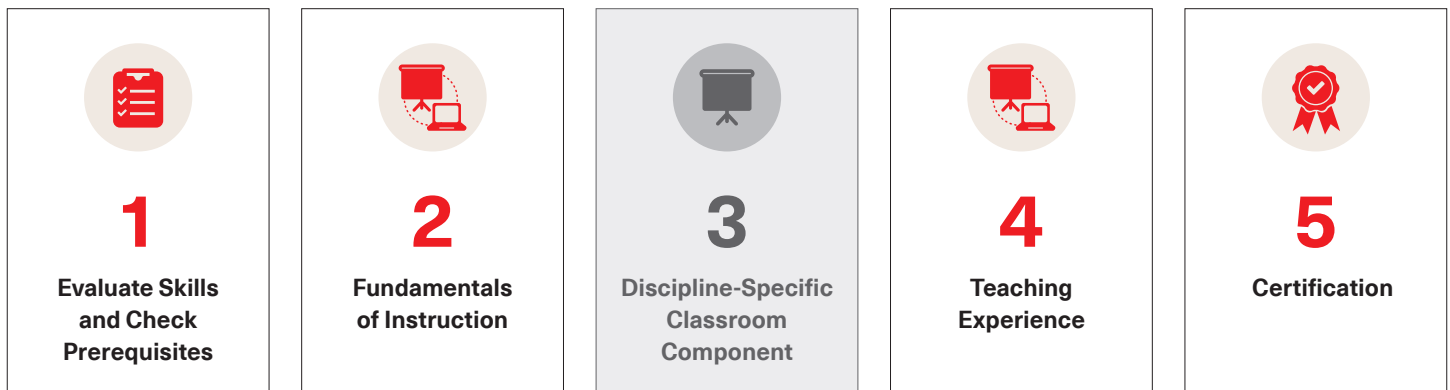

\*Prerequisites are determined by the discipline area (i.e. First Aid & CPR, Professional Responder, Wilderness & Remote First Aid, Psychological First Aid).

## What's involved?

Depending on your training background, there are two pathways to become a certified Instructor. Each of the completion criteria of the Instructor Development Program must be met; however, candidates receive recognition for some learning components gained through previous experience. Candidates should contact Red Cross to determine if their current certifications meet the requirements for a transfer option. Certification is valid for three years.

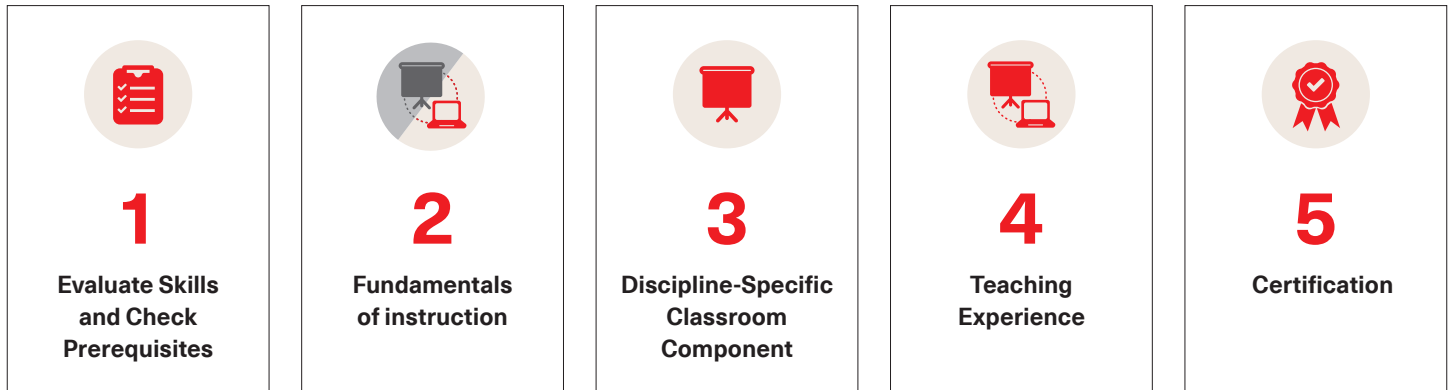

## OPTION 1: Instructor Candidates with Previous Instructional Experience

This option is for candidates with a current Instructor level certification through another recognized training agency, who hold a current participant level certification in the discipline they wish to teach. Candidates will follow the pathway below and are not required to complete Step 3.

## OPTION 2: Instructor Candidates with Previous Experience as an Educator or Red Cross Water Safety Instructor/Trainer

This option is for candidates with previous experience as a Canadian Red Cross Water Safety Instructor/Instructor Trainer or as an educator (elementary or secondary level), who hold a participant level certification in the discipline they wish to teach. Candidates will not be required to complete the in-class component of Step 2.

### What courses will you be able to teach?

Instructors can teach the participant level courses in the discipline for which they have the Instructor level certification.
