

Common Safety Orientation (CSO)

4 Hour Course

The Common Safety Orientation (CSO) is intended for new workers in the oil and gas industry. With content that is driven and endorsed by industry, the CSO provides consistent safety messaging that clearly explains safe work practices and eliminates the need for redundant general orientation.

TOPICS INCLUDE:

- Personal accountability for a safe work environment
- Arriving ready to work
- Major hazards in the oil and gas industry
- The Life Saving Rules
- Worksite maintenance
- Emergency preparedness and response procedures
- Reporting incidents and near misses
- Safe work communications
- Contributing to a respectful workplace
